

Project Initialization and Planning Phase

Date	28 june 2026
Team ID	xxxxxxx
Project Name	Credit card approval prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A retail banking credit officer review team.	Instantly assess whether a new applicant is eligible for a credit card.	The manual checking of historical payment logs takes days.	The incoming volume of applications is too high and leads to operational backlogs.	Stressed about delays and worried about human error or bias in approval decisions.
PS-2	A self-employed business applicant with a fluctuating monthly revenue stream.	Obtain a secure credit line to manage seasonal cash flow.	Traditional linear banking scoring matrices flag my profile as unstable or high-risk.	Legacy rule systems cannot effectively capture non-linear patterns in modern financial profiles.	Anxious about sudden rejections despite having a fundamentally solid credit history.

PS-3	A young salaried working professional applying for an initial credit facility.	Get my first credit card approved to establish a credit profile.	The system auto-rejects applications with blank historical credit track records.	The existing data processing models over-index on historical data instead of analyzing current socioeconomic features.	Frustrated by the lack of financial inclusion and an inability to build a financial footprint.
